SoC description	Recommended reusable IPs	Capabilities still missing
plate_recognition Single-camera parking node Camera input / Ethernet	MIPI CSI-2; I2C; Ethernet; Performance counter; Frame buffer; SRAM scratchpad; AXI DMA interconnect; AXI-Lite control	None identified
recognition Green-marker detector SPI input / UART output	UART; Frame buffer; AXI-Lite control	SPI slave frame ingress JTAG debug SRAM scratchpad access
scan USB document scanner Page input / mask output	Performance counter; SRAM scratchpad; AXI-Lite control	USB device controller Page-transfer DMA Page/frame buffering
wami Airborne imaging payload Raw camera / Ethernet	Camera I2C control; Ethernet; Trace monitor; Frame buffer; DDR memory controller; AXI DMA interconnect; SRAM scratchpad; AXI-Lite control	Raw MIPI CSI-2 receiver Frame-ordered streaming DMA
nightvision Dual-camera night viewer Paired input / local display	I2C; Performance counter; Video output; SRAM scratchpad; AXI DMA interconnect; AXI-Lite control	Dual MIPI CSI-2 reception SPI panel control Paired-frame buffering
